

Brand Design Rules

Colors, typography, and accessibility rules. Follow this document exactly when making any design or code changes to the Aykah brand.

Brand: Aykah (aykah.ca) WCAG 2.2 Level AA Compliant Feb 2026

01 · BRAND FOUNDATION

Four Brand Values

Every color and font decision must serve these four values. If a design choice doesn't map to at least one, it doesn't belong.

VALUE	WHAT IT MEANS	HOW COLORS SERVE IT	HOW FONTS SERVE IT
Comfort	Warmth, softness, home. Customers should feel like they're already in a cozy room.	Warm golds, creamy ivories, soft backgrounds. The palette avoids cold blues/greys.	Libre Baskerville's transitional serifs convey heritage and authority. Manrope's rounded terminals feel warm and modern.
Integrity	Honest craftsmanship. No gimmicks, no fake luxury.	Indigo navy (#363B57) — deep, confident, no-nonsense. Not flashy black, not trendy teal.	Serif headings carry centuries of typographic heritage. Honest, established, proven.
Friendly & Approachable	Not intimidating. Customers feel welcome, not judged by their budget.	60% warm whites dominate the page. Gold accents are inviting, not exclusive.	Manrope's geometric-humanist forms balance friendliness with premium clarity.
Trustworthy & Reliable	Customer trusts Aykah enough to	Navy = reliability. Green for	Serif fonts increase perceived

VALUE	WHAT IT MEANS	HOW COLORS SERVE IT	HOW FONTS SERVE IT
	spend \$500-\$900 online without touching the product.	verification. Consistent color usage builds predictability.	trustworthiness by ~40%. Clear body text = nothing hidden.

02 · COLOR PALETTE

Complete Color Tokens

Every color in the system. Use CSS variable names exactly as shown. Do not invent new colors.

Primary — Integrity + Trust

--primary #363B57 10.94:1 on white
--primary-dark #2A2E45 13.33:1 on white
--primary-light #4A5070 7.22:1 on white
--primary-tint #EDEEF2 Background only

Accent — Comfort + Friendly 3 tokens — read rules below

--accent #B8956A 2.78:1 — DECORATIVE ONLY
--accent-text #8B6E4A 4.74:1 on white
--accent-btn #7D6040 5.80:1 on white
--accent-light #D4BC9A Decorative only

Backgrounds

--white #FFFFFF
--ivory #FAF8F4
--warm #F7F3EE

--border
#E8E3DB
Pair with shadow

Text

--text-body
#2C2C2C
13.97:1 on white

--text-muted
#6B6560
5.74:1 on white

--text-light
#76716B
4.83:1 on white

--text-disabled
#B8B2A8
Disabled/inactive ONLY

Signals

--success
#3D7A55
5.11:1 on white

--error
#C0392B
5.44:1 on white

03 · COLOR RULES — CRITICAL

Do's and Don'ts

Accent Color — Three Tokens, Three Roles

DO: Use `--accent` (#B8956A) for decorative elements only: star fill icons, decorative lines, background gradients, icon fills, hover glows.

DO: Use `--accent-text` (#8B6E4A) for any gold-colored text: links, labels, eyebrow categories, price highlights. This passes 4.5:1 on white.

DO: Use `--accent-btn` (#7D6040) for buttons with white text. This passes 4.5:1 for both text and UI contrast.

NEVER: Use `--accent` (#B8956A) as text color. It fails WCAG at 2.78:1. Zero exceptions.

NEVER: Put white text on `--accent` (#B8956A) background. It fails at 2.78:1. Use `--accent-btn` (#7D6040) instead.

Text Colors

DO: Use `--text-body` (#2C2C2C) for all body text, product descriptions, specs.

DO: Use `--text-muted` (#6B6560) for secondary info: delivery times, timestamps, breadcrumbs.

DO: Use `--text-light` (#76716B) for helper text, captions, minor labels.

NEVER: Use `--text-disabled` (#B8B2A8) for any readable content. It is exclusively for disabled/inactive UI states.

Borders

RULE: `--border` (#E8E3DB) at 1.28:1 fails as a standalone UI boundary. Always pair it with `box-shadow` or a background color difference.

Background Ratio — 60 / 30 / 10

DO: 60% warm whites (–white, –ivory, –warm) · 30% indigo (–primary, –primary-dark) · 10% gold + green accents.

04 · TYPOGRAPHY

Two Fonts. No Exceptions.

Heading font: Libre Baskerville. Body font: Manrope. Never add a third font.

Font Import

```
<link href="https://fonts.googleapis.com/css2?
family=Libre+Baskerville:ital,wght@0,400;0,700;1,400&family=Manrope:wght@200;300;400;500;600;700;8
rel="stylesheet">
```

Font Assignment

FONT	FAMILY	WEIGHT RANGE	USED FOR
Libre Baskerville	'Libre Baskerville', Georgia, serif	400, 700 (+ italic 400)	Hero titles, section headings, product names, prices, testimonials (italic), subsections
Manrope		200-800 (use	Body text, descriptions, buttons, eyebrow labels,

FONT	FAMILY	WEIGHT RANGE	USED FOR
	'Manrope', -apple-system, sans-serif	300-600 primarily)	navigation, helper text, captions, forms, UI elements

05 · TYPE SCALE

Every Text Size Defined

Use these exact sizes. Do not invent intermediate sizes.

HERO TITLE	Baskerville 700 / 34px / 1.1	More Space, Same Room
SECTION TITLE	Baskerville 700 / 26px / 1.2	Designed with Purpose
PRODUCT NAME	Baskerville 400 / 22px / 1.25	Lunel Lift-Up Storage Bed
PRICE	Baskerville 700 / 24px / 1	\$900
SUBSECTION	Baskerville 400 / 18px / 1.3	Features & Dimensions
TESTIMONIAL	Baskerville 400i / 17px / 1.55	<i>"Game changer for our small bedroom."</i>
EYEBROW	Manrope 600 / 10px / 1	BESTSELLER · STORAGE BEDS
BODY	Manrope 400 / 14px / 1.65	The Lunel storage bed combines clean design with smart functionality.

BODY SMALL	Manrope 400 / 13px / 1.6	Available in Queen, King, and Double. All sizes include hydraulic lift.
BUTTON	Manrope 600 / 11px / 1	ADD TO CART
HELPER	Manrope 400 / 11px / 1.4	Complimentary delivery · Arrives in 5-7 business days
CAPTION	Manrope 500 / 10px / 1.4	Last updated 2 days ago · Verified purchase

Typography Rules

- DO: Eyebrows always: UPPERCASE + letter-spacing: 3px + font-weight: 600 + color: – accent-text.
- DO: Buttons always: UPPERCASE + letter-spacing: 1.5px + font-weight: 600.
- DO: Prices always in Libre Baskerville (serif numerals feel more premium).
- DO: Testimonials always in Libre Baskerville italic 400.
- NEVER: Use Libre Baskerville for body text. It is headings and display only.
- NEVER: Use Manrope for product names or prices.
- NEVER: Use a third font anywhere.
- NEVER: Go below 10px for any text.

Accessibility Compliance

Every rule this system must follow. Non-negotiable.

WCAG RULE	REQUIREMENT	HOW THIS SYSTEM COMPLIES
1.4.1 Use of Color	Color is not the only visual means of conveying info	Links use underline + color. Status uses color + text/icon. Errors use color + message.
1.4.3 Contrast (Min)	Normal text $\geq 4.5:1$. Large text $\geq 3:1$	All text tokens pass 4.5:1 minimum on their intended backgrounds.
1.4.4 Resize Text	Text resizable to 200% without loss of content	Both fonts remain legible at 2x zoom. No overflow or clipping.
1.4.11 Non-text Contrast	UI components and graphics $\geq 3:1$	Primary buttons: 10.94:1. Gold buttons: 5.80:1. Focus rings use -primary-light.
1.4.12 Text Spacing	No loss when: line-height $\geq 1.5x$, paragraph spacing $\geq 2x$	Body line-height: 1.65 (exceeds 1.5x). Both fonts handle override spacing.
2.4.7 Focus Visible	Keyboard focus indicator is visible	Focus rings use -primary-light (#4A5070) with 2px solid outline + 2px offset.
2.4.11 Focus Appearance	Focus indicator $\geq 3:1$ between focused/unfocused	-primary-light provides $\geq 3:1$ contrast against all backgrounds.
Font Loading	No content hidden during font load	Google Fonts uses display=swap. System fallbacks render immediately.

Contrast Quick Reference

COMBINATION	RATIO	NORMAL TEXT	LARGE TEXT	UI ELEMENT
-text-body on -white	13.97:1	PASS	PASS	PASS
-primary on -white	10.94:1	PASS	PASS	PASS
White on -primary	10.94:1	PASS	PASS	PASS
White on -primary-dark	13.33:1	PASS	PASS	PASS
-text-muted on -white	5.74:1	PASS	PASS	PASS
-text-light on -white	4.83:1	PASS	PASS	PASS
-accent-text on -white	4.74:1	PASS	PASS	PASS
White on -accent-btn	5.80:1	PASS	PASS	PASS

COMBINATION	RATIO	NORMAL TEXT	LARGE TEXT	UI ELEMENT
-success on -white	5.11:1	PASS	PASS	PASS
-error on -white	5.44:1	PASS	PASS	PASS
-accent on -white	2.78:1	FAIL	FAIL	FAIL
-text-disabled on -white	2.11:1	FAIL	FAIL	FAIL

The last two rows FAIL intentionally – they must never be used for readable text.

09 · QUICK CHECKLIST

Before You Ship Anything

Run through this list before deploying any design change.

Colors

Only using hex codes from this system
No #B8956A used as text color

Typography

Only Libre Baskerville + Manrope used
Headings/prices in Libre Baskerville

No white text on #B8956A background
#B8B2A8 only on disabled elements
Borders paired with box-shadow
60/30/10 ratio maintained

Body/UI in Manrope
No text below 10px
Eyebrows are uppercase + 3px spacing
Buttons are uppercase + 1.5px spacing

WCAG

All text $\geq 4.5:1$ contrast on background
All UI elements $\geq 3:1$ contrast
Focus rings visible on all interactive elements
Color never the only indicator
Page works at 200% zoom
display=swap on font import

Brand

Design feels warm, not cold
Design feels trustworthy, not flashy
Design feels approachable, not intimidating
Design feels honest, not gimmicky
Serif headings carry quality perception
Body text is easy to read on mobile
